# RESTROOM SYSTEMS

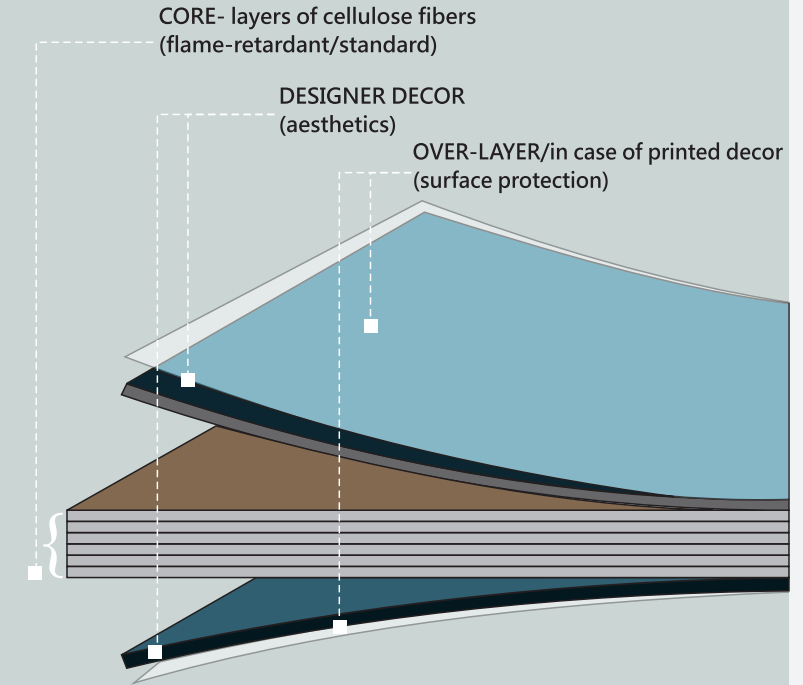

## Advantages of Dry Restroom System

- Space saving giving flexibility and space management options
- Hygienic and well ventilated
- Fire, water and scratch resistant
- Speedy installation and faster project completion
- Attractive colour and hardware options
- Reduction in steel and cement thereby reduced building load
- Overall cost saving
- Pioneering modern building construction & management system
- Long lasting and reusable

## Disadvantages of Wet Restroom System

- Difficult to clean and to maintain hygiene standards
- Accumulation of dirt and stains
- Absorption of water in tile grout joints leads to bad odour
- Poor space management
- No natural ventilation
- Difficulty in procurement and replacement of tiles
- Higher building load
- High maintenance cost and supervision
- No scope of modification without loss of materials and money

## MATERIAL CONFIGURATION

## Compact solid grade laminate board

The compact board comprises of cellulose fibrous material (generally paper). The core is made up of layers of cellulose fibers impregnated with thermosetting Phenolic Resin and the decorative design paper on both sides impregnated with special melamine resin is manufactured under the combined application of heat (1550 C) and high pressure (specific pressure: 9MPa/90 Bar) in a multi day light press in which resin poly condensation takes place to give the product that extra performance through & through - strength, durability and toughness. The board is manufactured as per IS 20146.

## SMART SERIES

Bespoke, sleek design, easy maintenance and budget-friendly options make this the most popular model. Smart series is offered with Anodized Aluminium framework and choice of design of top rail combined with SS 316 and SS 304 accessories. High-performance spring hinges to provide a soft closing of doors and sustained use.

## SMART SERIES - BOQ

### ITEM DESCRIPTION

Providing and fixing toilet cubicle systems of DEBO/STYLAM make and installed by Super Creations in standard dimensions of 900-1200mm width X 1500mm depth X 2000mm height with a door size of 600mm width X 1830mm height with 12mm thickness.

The solid grade Compact Laminate panels made of Phenolic resins under high pressure and temperature having density >1.40 kg/ m<sup>3</sup>, including doors, pilasters & intermediate panels, which are resistant to heat, bacteria, chemical, scratch, impact and water immersion through permissible increase on weight will be <0.60~0.8%.

Finished product will be as per approved texture, shade & drawing, detailing and developed according to IS-2046 and EN438 standards and as per fire retardant BS-476/97 standard. The product should have Green Guard Certificate. The toilet cubicle setup shall include necessary hardware fittings, made out of stainless steel (Grade-304 & 316), as per manufacturer's specifications and approved by the engineer.

### Hardware fittings should consist of

- ✓ Aluminium anodised SS finish U-channels
- ✓ Aluminium anodised SS finish top rail
- ✓ Aluminium anodised SS finish door stopper channel
- ✓ Aluminium anodised SS finish L- channel
- ✓ SS 316 adjustable foot with 150mm clearance
- ✓ SS 304 indicator lock
- ✓ SS 304 door knob
- ✓ SS 304 coat hook
- ✓ SS 304 spring hinges
- ✓ SS 304 screws and PVC wall plugs
- ✓ Door noise reduction tape

The top fitting arrangement shall comprise of aluminum anodized top rail, fixed to pilasters. In the absence of brick walls, aluminum anodized L -channel (connected to the top rail) shall be used at the corners of the cubicle. All screws should be of stainless steel (Grade-304). All pilasters shall be supported by stainless steel (Grade-316) adjustable foot.

The base of the stainless steel adjustable leg shall be anchored to the floor with a clearance height of 150mm. The intermediate panel shall be of one continuous panel without any joint. All visible edges shall be chamfered.
